EDUCATION

DePaul University

Masters of Science in Computer Science (AI), GPA:3.80

Chicago, United States

Sept 2024 - July 2026

SKILLS

Languages: SQL, Python, JavaScript, Java, Scala, R, HTML/CSS

Frameworks/Tools: Git, Scikit-learn, Matplotlib, Pandas, NumPy, TensorFlow, Oracle Data Integrator, MicroStrategy

Research Interests: Artificial Intelligence, Deep Learning, Natural Language Processing (NLP), MLOps

PROFESSIONAL EXPERIENCE

DePaul University

AI Research Assistant

Chicago, United States

July 2025 - Present

- Conducting AI research on scientific chart mining under Professor Kenny Davila, experimenting with detection methods (DB, DB++, PSENet, EAST) and PPHGNetV2_B4 backbone with SVTR recognition, achieving 97% accuracy through preprocessing optimization and custom dataset fine-tuning.

Cotiviti Nepal Pvt. Ltd.

Software Engineer

Kathmandu, Nepal

July 2021 - July 2023

- Built ETL pipelines using SQL, PL/SQL, and ODI to process US healthcare PHI data; created client-specific layouts with data profiler checks to maintain quality and implement new clients into Cotiviti.
- Collaborated with cross-functional teams (developers, QA, PMs) to deploy data solutions for 15+ US healthcare clients. Trained and mentored 10+ team members (IS and PI teams) on ODI workflows.

Kathmandu University

Graduate Research Assistant

Dhulikhel, Nepal

Mar 2021 - Apr 2022

- Involved in developing a Nepali image captioning model using CNN and Transformer architectures.
- Enhanced model performance through hyperparameter tuning and attention mechanisms and optimized using BLEU and METEOR metrics.

LIS Nepal Pvt. Ltd.

Business Intelligence Intern

Lalitpur, Nepal

Jan 2020 - Apr 2020

- Developed retail analytics solutions using SQL, ODI and OBIEE and created reports using MicroStrategy.
- Gained expertise in ODI data validation, ETL processes, parallel query processing, and PL/SQL.

PROJECTS

Evolution Simulator, *A demonstration of genetic algorithm*

May 2018 - Aug 2018

- Designed and created a simulation where bipedal creatures evolve to walk like humans using genetic algorithms.
- Featured on www.aijs.rocks.

Machine Learning Projects, *Implementation of multiple ML algorithms*

Nov 2024 - Jan 2025

- Implemented regression (Linear, Decision Tree) and classification models (KNN, SVM, Logistic Regression) for CO2 forecasting, fraud detection (98% recall), cancer classification (96% F1-score), and churn prediction.

ACHIEVEMENTS

- Published Research Paper: "Evaluating the Application of SOLID Principles in Modern AI Framework Architectures" on arXiv (2025)
- Associate Member, Sigma Xi, The Scientific Research Honor Society (2025)
- IBM AI Engineering Professional Certificate (Ongoing)
